IGI LABORATORY GROWN DIAMOND GRADING REPORT

January 8, 2020

IGI Report Number LGM3E70354

Shape and Cutting Style ROUND BRILLIANT

Measurements 8.36 - 8.40 x 5.09 mm

GRADING RESULTS

Carat Weight 2.17 CARATS

Color Grade G

Clarity Grade VVS 2

Cut Grade IDEAL

ADDITIONAL GRADING INFORMATION

Polish EXCELLENT

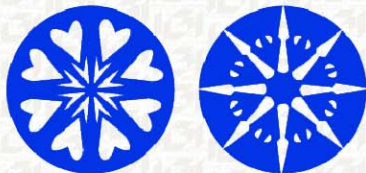

Symmetry EXCELLENT

Fluorescence NONE

Inscription(s) LABGROWN IGI LGM3E70354

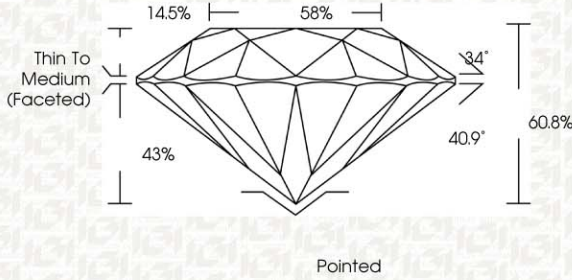

Comments:

HEARTS & ARROWS
This Chemical Vapor Deposition (CVD) laboratory grown diamond is classified as Type IIa.

The Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded, and LaserScribedSM by International Gemological Institute (IGI). A LGD has essentially the same optical characteristics as a natural diamond. IGI's grading system is based on the same criteria as the International Gemological Institute (IGI). A typical LGD is a colorless to light yellowish-brown diamond with a clarity grade of VVS to SI. The chemical composition of a LGD is Type IIa. The growth mechanism of a LGD is different from that of a natural diamond. IGI utilizes the most advanced techniques and includes a variety of tests to identify a LGD. IGI's grading system is based on the same criteria as the International Gemological Institute (IGI). The presence of a LGD in a report does not indicate that the diamond is not natural. This Report includes advanced security features and is designed to be used for identification and appraisal and by making this report IGI does not agree to purchase or replace the article.
